

Call for Papers

Liquid Biopsy in Precision Oncology

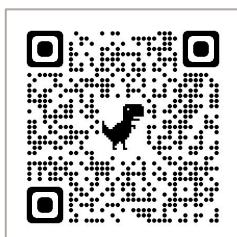

[Journal of Experimental & Clinical Cancer Research](https://www.biomedcentral.com/journal/1745-7256) is calling for submissions to our Collection on 'Liquid Biopsy in Precision Oncology.'

In this Collection, we will attempt to provide an overview of the current LB field in precision oncology, including innovative research and clinical applications. We will focus on the clinical implementation of research discoveries in line with the aims of the European Liquid Biopsy Society (ELBS) consortium (www.elbs.eu). In particular, we will identify the challenges of LB-implementation into clinical trials and practice, taking all stakeholder's perspectives into account. This is an important step to ensure that liquid biopsy tests soon become part of clinical routine to benefit cancer patients worldwide, which is at the core of all ELBS initiatives and activities.
